

Preparation

1 Install AutoPro X app

Search for "AutoPro X" on Google Play Store and install it

Auto Pro X
MAYTON

Scan with your phone and tap the link.

2 Turn on "Wireless AA vehicle Mode"

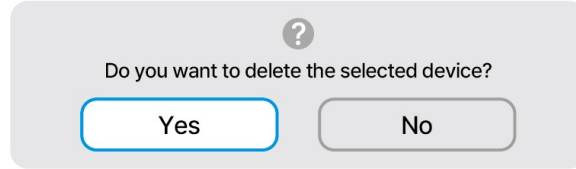

Allow all permissions, then enable "Wireless Android Auto Vehicle Mode" in the AutoPro X app!

How to Connect

1 Remove your phone from the car.

In the Phone Projection menu, delete all paired devices.

2 Unpair your car from your phone.

In your Samsung phone, unpair your car.

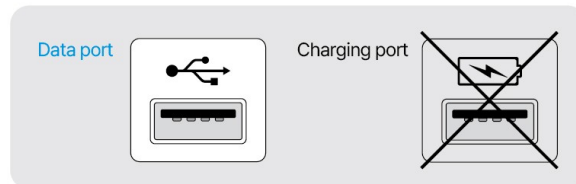

3 Connect AutoPro X to the vehicle.

Connect AutoPro X to the vehicle using a cable.
If it isn't recognized or the LED keeps blinking, contact support for assistance or a cable replacement.

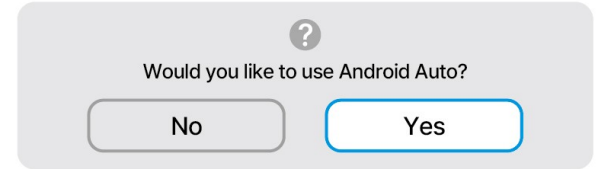

*Plug it into the data port.

*Toyota/Lexus - Black cable needed

4 Select "Use" on the popup message.

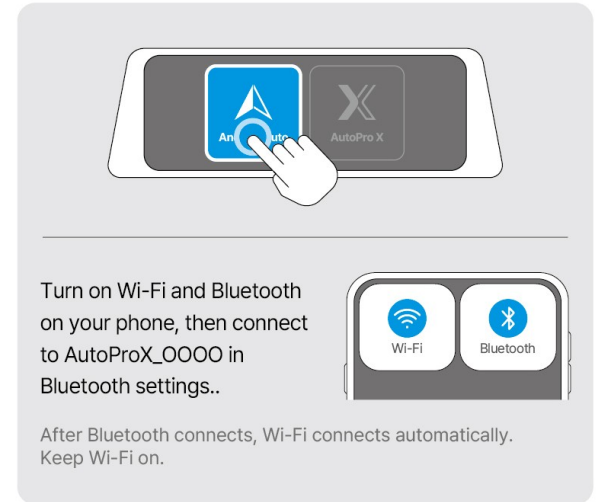

After connecting, select "Use" on the Android Auto popup.

5 First-time Android Auto connection required.

Select Android Auto mode on the left.

A one-time connection is needed for calls and music.

*If Android Auto won't open, go to your phone's
Settings → Apps → Android Auto → Storage → Clear Data.

How to Connect

6 Connect DeX.

On the AutoPro X home screen, select AutoPro X mode on the right.
Selecting AutoPro X mode will disconnect Android Auto.

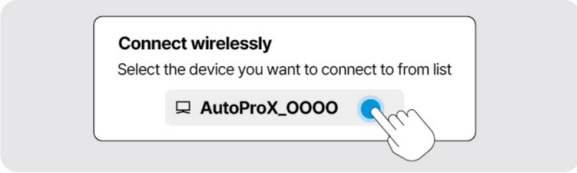

Run Samsung DeX on your smartphone.

- **Option 1 : Through Settings**
Settings → Connected Devices → Samsung DeX
- **Option 2 : From the Quick Panel**
Swipe down from the top → Tap the DeX icon
- **Option 3 : Using Bixby**
Activate Bixby → Say "Run DeX"

In the "Connect wirelessly" list, select AutoProX_0000.

- * **Switch to DeX after Android Auto connects**
Apps in the bottom left corner → Tap the first app (logo)
- * **Switch to Android Auto after DeX connects**
Apps in the bottom left corner → Tap 'Exit DeX'
(or tap the DeX on your phone to exit)
