The voting age should be raised to 21 to ensure more mature voters.

- ▶ By 21, individuals generally have more life experience and emotional maturity, leading to more informed voting decisions.
- ▶ Research shows that decision-making areas of the brain continue developing until the early 20s, suggesting older voters may be less impulsive.
- ▶ At 21, many people are handling their own finances, which may make them more invested in economic and fiscal policies.

**PRO**

- ▶ Raising the age excludes younger voices from issues that impact them directly, such as education and employment.
- ▶ Age doesn't guarantee maturity; many 18-year-olds are informed and responsible enough to make sound voting choices.
- ▶ At 18, individuals can serve in the military, pay taxes, and are legally adults; denying them the right to vote would be contradictory.

**CONTRA**

**School uniforms limit students' freedom of expression and should be abolished.**

- ▶ Uniforms reduce the emphasis on appearance, helping students focus more on academics rather than fashion.
- ▶ Wearing a uniform can instill a sense of structure and discipline, which some believe translates to better behavior and academic focus.
- ▶ With uniforms, there is less competition over clothing brands or styles, which can reduce bullying related to appearance.

## PRO

- ▶ Allowing students to choose their attire encourages self-expression and creativity, which are essential for personal growth.
- ▶ Families would avoid the additional expense of uniforms, allowing students to wear clothing they already own.
- ▶ Without uniforms, students can incorporate cultural or religious attire, promoting inclusivity and awareness of diverse backgrounds.
