

CTK BLOCK PRO

ADDITIONAL MATERIALS

BlockPro is an acoustic membrane material made with non-woven fabric on a polymer layer with improved adhesive properties. BlockPro is intended for application as a third and final layer on the noisiest parts of the car body. It should be applied only on horizontal surfaces. BlockPro is flexible and does not lose efficacy in a wide range of temperatures.

Recommended for:

floor, trunk floor.

	SIZE		THICKNESS		SHEETS
	MM	INCH	MM	MIL	PCS
370 X 500	370	14.6" X 19.7"	2.0	79	16
			3.0	118	12
700 X 500	700	27.6" X 19.7"	2.0	79	12
			3.0	118	8
