

## THE MOST SUSTAINABLE AND ENVIRONMENT FRIENDLY PROCESS FOR THE PRODUCTION OF OFFSET PRINTING BLANKETS USING “ZEROSOLVENT TECHNOLOGY”

*Acoprint is a complete range of  
blankets manufactured by Acoma  
Meticulously controlled manufacturing  
process and superior dimensional stability*

*Exceptional consistency  
from batch to batch*

*Precisely microground and polished  
surface with excellent printing results*

*Superior quality of compressible layer  
(closed cells) thanks to an innovative  
and unique production process*

*Extended durability*

*Outstanding price/performance ratio*

**100% Solvent-free production:**  
*The true “green blankets”*

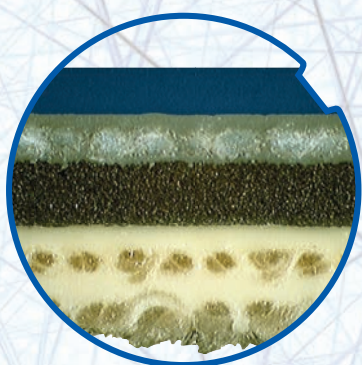

***Innovation  
and tradition***

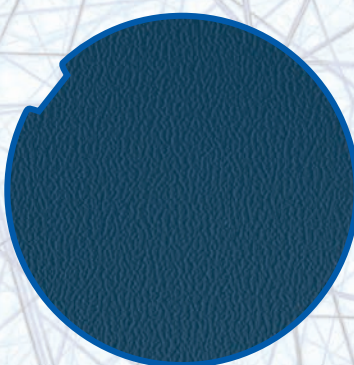

*Designed for use on large format sheetfed presses & commercial web presses*

*Suitable for conventional inks and hybrid inks*

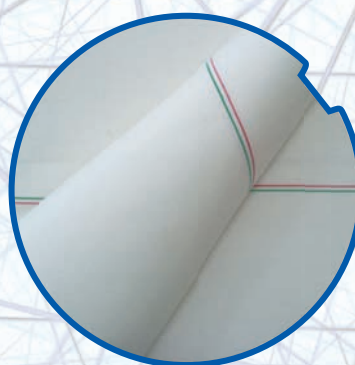

*Available in 1,95 mm*

## TECHNICAL DATA

Colour	Dark blue
Construction	3 fabric layers
Compressible Layer	Closed cells
Nominal Thickness	1,95 mm
Thickness range	1,92 ÷ 1,96 mm
Roughness Ra	0,8 ÷ 1,00 $\mu$ m
Surface Hardness	55° Shore A
Hardness (total)	77° Shore A
Tensile Strength	> 85 Kg/cm
Elongation at break	< 4,5%
Compressibility	20-35 Kg/cm <sup>2</sup> at 0,23 mm deformation
Application fields	Heatset, sheetfed
Identification lines	Red+green
Ink compatibility	Resistant to conventional and hybrid inks
