UniReliever

PDAC Approved L1843/L1851

Powerful OA correction in a brace that's lightweight, flexible, and easy to wear. The UniReliever from Thuasne USA is the universal OA bracing solution that's offering targeted relief and personalized fit, with trusted Thuasne hinge technology.

Featuring correction targets and individualized force offloading, the cross strap system with BOA dial technology makes it easy for patients to control their correction for greater pain relief.

Recommended for *conditions requiring mild to moderate osteoarthritis uni-compartmental offloading, meniscal cartilage repair, avascular necrosis, varus and valgus instability*

Thuasne motion hinge technology

(Lateral view)

Single BOA® dial for a more convenient correction experience combined with patella targets for easier alignment with knee center

Consolidated strapping system with force buttress allows even disbursement of load at the point of application.

(Medial view)
