

POLIUNDER SOFT

COMPRESSIBLE UNDERPACKING FOR VARNISHING PLATES

For smoother, glossier, easier varnishing effect

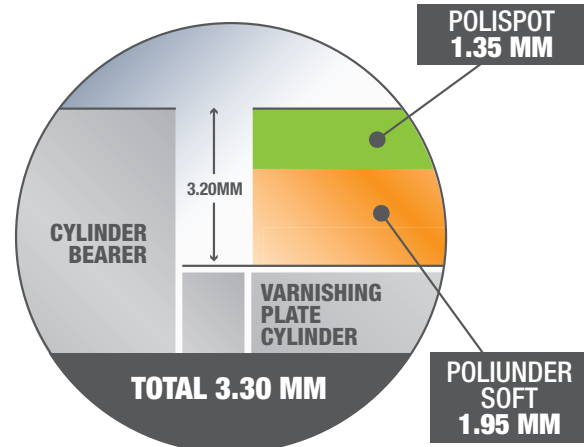

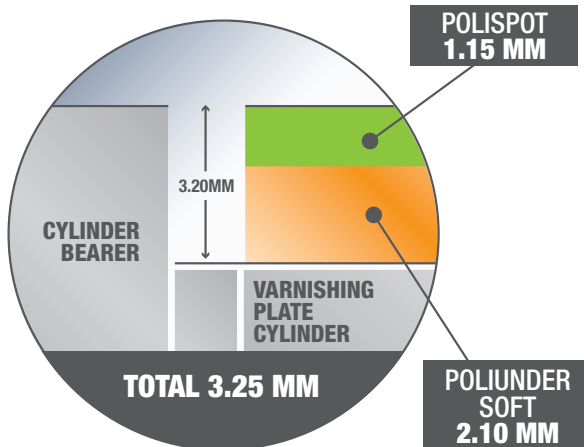

Poliunder Soft is a compressible rubber underplate, on a textile base. The textile layer helps the plate to better adapt to the cylinder as it smoothens the friction that is

generated when the plate is tightened into the cylinder. The rubber layer helps producing the smoothest coating because it is highly compressible.

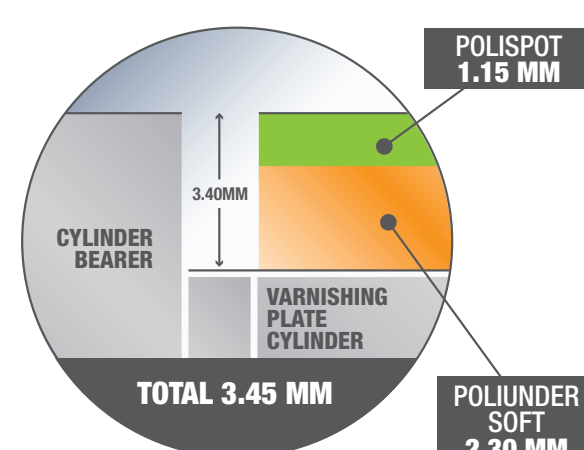

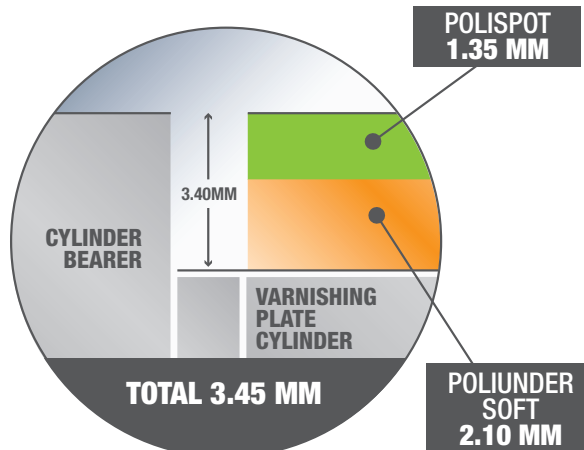

POLIUNDER SOFT

Specially designed for varnishing plate underpacking for both commercial and hardboard packaging printing. An adhesive version is also available.

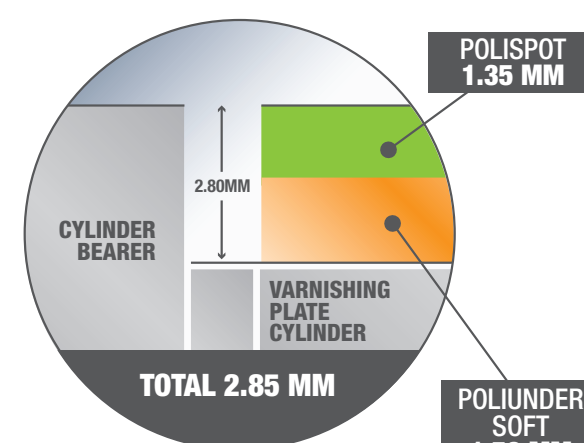

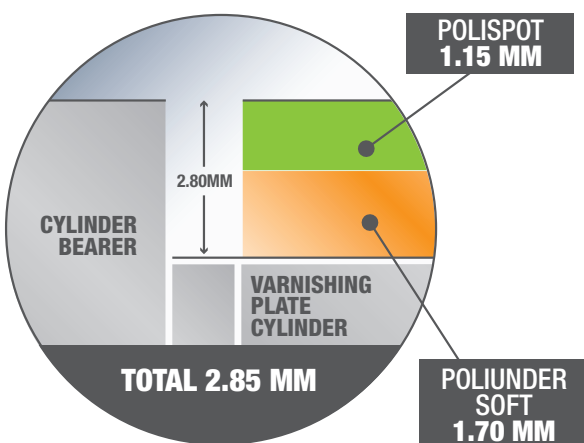

3.20MM UNDERCUT

3.40MM UNDERCUT

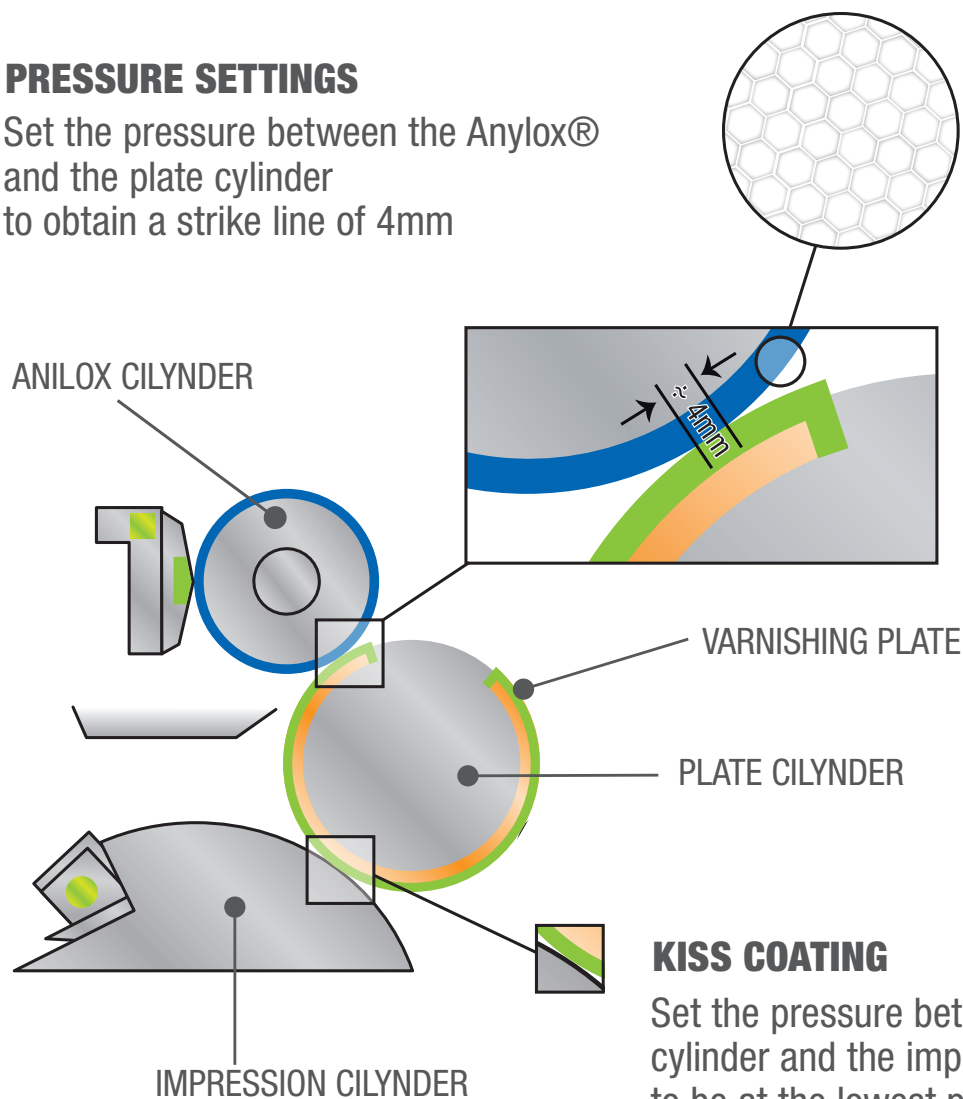

2.80MM UNDERCUT

HELPFUL HINTS FOR BEST PRESSURE ADJUSTMENT

PRESSURE SETTINGS

Set the pressure between the Anylox® and the plate cylinder to obtain a strike line of 4mm

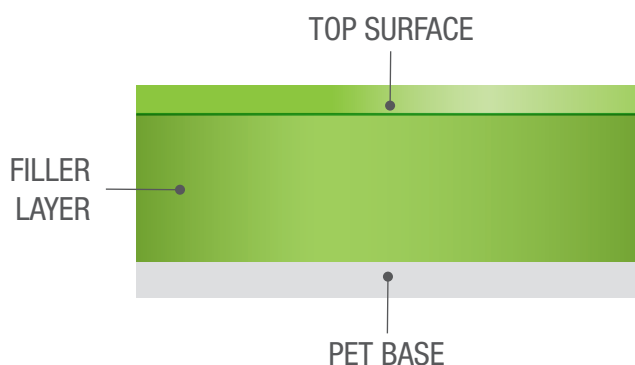

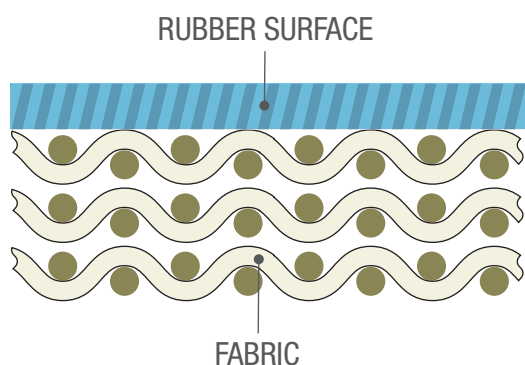

KISS COATING

Set the pressure between the plate cylinder and the impression cylinder to be at the lowest possible level (kiss coating)

TENSIONING OF THE VARNISHING PLATE

Blanket (fabric base) and varnishing plates (pet base) have a different elongation feature; therefore the tension force (torque) to be applied to varnishing plates is 30% of the force to be applied to blankets (as instructed in the press manual).

POLIUNDER SOFT

Poliunder Soft is available in rolls and sheets of different thicknesses:

| PRODUCT | ROLLS | SHEETS | THICKNESS |
|-------------------------|--------------------------------|------------------------|---|
| POLIUNDER SOFT | 1080mm x 20mm 1460mm x 20mm | all sizes available | 1,50mm - 1,70mm - 1,95mm 2,10mm - 2,30mm |
| POLIUNDER SOFT ADHESIVE | 1080mm x 20mm 1460mm x 20mm | all sizes available | 1,50mm - 1,70mm - 1,95mm 2,10mm - 2,30mm |

Poliunder is the ideal complement to our Polispot varnishing plates:

| | |
|-----------------------|--------------------------------|
| POLISPOT | for aqueous and UV varnish |
| POLISPOT AQUA | for aqueous varnish |
| POLISPOT PLUS | for universal varnishing plate |
| POLISPOT COMPRESSIBLE | highly compressible |
| POLISPOT UV | specific for UV varnish |
| POLISPOT ADHESIVE | direct (inline) varnishing |
| POLICOAT | indirect (offline) varnishing |
