

THE MOST SUSTAINABLE AND ENVIRONMENT FRIENDLY PROCESS FOR THE PRODUCTION OF OFFSET PRINTING BLANKETS USING “ZEROSOLVENT TECHNOLOGY”

*Acoprint is a complete range of
blankets manufactured by Acoma
Meticulously controlled manufacturing
process and superior dimensional stability*

*Exceptional consistency
from batch to batch*

*Precisely microground and polished
surface with excellent printing results*

*Superior quality of compressible layer
(closed cells) thanks to an innovative
and unique production process*

Extended durability

Outstanding price/performance ratio

100% Solvent-free production:
The true “green blankets”

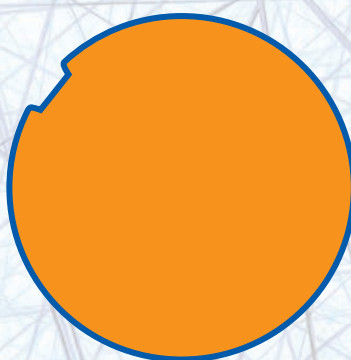

***Innovation
and tradition***

ACOPLAST ORANGE

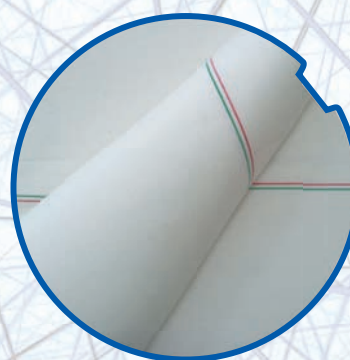

Special designed blanket for plastic and pot printing
Very smooth and high abrasion resistance top face
Dedicated to UV inks

TECHNICAL DATA

Colour	Orange
Construction	3 fabric layers
Nominal Thickness	1,70 mm / 1,95 mm
Thickness range	1,67 ÷ 1,71 mm / 1,92 ÷ 1,96 mm
Roughness Ra	0,4 ÷ 0,6 µm
Surface Hardness	60° Shore A
Hardness (total)	80° Shore A
Tensile Strength	> 75 Kg/cm
Elongation at break	< 4,5%
Application fields	Plastic pot and tubes
Identification lines	Red+green
Ink compatibility	Resistant UV inks
